AMARANTH

Dea is an Amaranth with dark red oval leaves. It has a vigorous growth and is fast maturing. The taste is mild and pleasant. Healthy in the field.

RED GARNET

Fast growing. Variety with wine red color leaves. Ideal for the production of micro greens.

SSC3099

Uniform product. Leaves of intense red color. Ideal for the production of micro greens.

General information (prior to reading the catalogue, please consult this section first).

This catalog has been produced for professionals. The photos, descriptions and recommendations given in our catalogs and documents are for information purposes only and may not, under any circumstances, be considered to form part of a contract or a guarantee on produce. The results obtained by our customers depend on a large number of conditions. Besides the variety and quality of the seed, such results are also conditional on factors that are difficult or impossible to assess or predict. Results may vary especially from region to region due to the environment, farming and weather conditions, changes in technical knowledge as well as cultivation techniques and operations. Genetic resistances do not preclude the necessary use of supplemental preventive or phytosanitary measures. Any complete or partial reproduction of this publication by any means (print, photography, microfilm or other) is strictly forbidden without the prior written consent of the publisher.

VILMORIN-MIKADO, VILMORIN-MIKADO, A NEW GLOBAL DIMENSION!

Vilmorin is a brand of Vilmorin-Mikado, which is a Business Unit of Limagrain, integrating the activities of Vilmorin (French seed company) and Mikado Kyowa Seed (Japanese seed company). Limagrain is an international cooperative group created and directed by farmers. It’s the fourth largest seed company in the world.

Vilmorin-Mikado is a global seed business unit which has strong bases spread over the five continents; it offers a wide, unique and original high-quality range to all professionals in the vegetable industry.

Vilmorin-Mikado team delivers a strong commitment to customer-service and passion for vegetables. Strong by its diversity and entrepreneurship spirit, it holds our values of audacity, proximity and excellence.

From Vilmorin-Mikado, expect quality seeds of the tastiest products for your markets.

Experience the Leafy choice

Close to the rapid evolution of the market, Vilmorin-Mikado offers a full range of high quality Leafy seeds. Its dedicated teams develop innovations adapted to the entire industry.

DEA (AM 3012)

Dea is an Amaranth with dark red oval leaves. It has a vigorous growth and is fast maturing. The taste is mild and pleasant. Healthy in the field.

RED GARNET

Fast growing. Variety with wine red color leaves. Ideal for the production of micro greens.

SSC3099

Uniform product. Leaves of intense red color. Ideal for the production of micro greens.

RUBENS (BB 207)

Red beet of Bulls Blood type. Very dark red. Will stay red also in warm summer conditions. Uniform variety. Later maturing than other Bulls Blood types.

DIGNUS (BB 214)

Red Beet of Bulls Blood type. Dark red leaves that are slightly savoyed. Faster maturity than BB 207. Uniform selection.
BB 217
Red beet of Bulls Blood type. Very dark red. Will stay red also in warm summer conditions. Uniform variety. Later maturing than other Bulls Blood types. Slightly more wavy leaf than Rubens and slightly darker red.

BB 218
New Bulls blood with very nice red color, uniformity and good vigor. Resistance to Pseudomonas syringae.

BULL'S BLOOD
Thick texture. Leaves of narrow oval shapes. Very nice dark red color.

DETROIT DARK RED
Vigorous variety. Variety particulary resistant to cold in winter. Bright green color and dark red veins. Attractive product.

RUBY RED

GRS GRAINE
Medium late broad leaf type. Dark green with serrated leaf shape. Upright growth shape. Vigorous and high yielding selection.

VERTE DE CAMBRAI
Medium dark to dark green leaves. Upright growth habit. Late bolting.

EBONY (AD 4832)
Very dark red and round leaves. Keeps the red also in hot periods.

RUS (AD 4835)
Kale with red veins. When grown for large plants the leaves will turn completely red during colder weather in the autumn.

DWARF GREEN CURLED SCOTCH
Baby kale with oval shape and irregular scalloped margins. Medium green color. The variety is suitable in winter slot with cold conditions.
**AMARA (SSC 3125)**
Vigorous growing. Produced with a good texture and a sweet taste with a hint of garlic. Dark green color. Scalloped margins.

**UPLAND CRESS**
Sweet taste. Variety adapted to cold weather. Small dark oval leaves. Fines stems.

**RUBRA (OR 3401)**
Orach belongs to the same family as Amaranth and Spinach. OR 3401 is a fast growing variety with a red leaf. The leaf is thick with a good texture for raw salads. Fine taste.

**CARLSBAD**
Carlsbad was derived from germplasm with crisp and extra thick texture. It is highly Bremia resistant and is ideal for baby leaf salads. It produces deep green colored leaves with excellent texture and serrated margins. Very upright growth. Bl:1-8US / Bl:16-20,22-25,27,28,30-32EU
U.S. Protected Variety / U.S. Patent No. 8,809,632

**DAREDEVIL**
A red leaf lettuce with remarkably thick texture. Dark wine-red leaves. Scalloped/serrated margins.

**GIMLET**
Gimlet is a red leaf lettuce selected for baby leaf salads. It produces glossy, wine-red leaves with wavy leaf margins and good texture. The leaves have a narrow stem which makes for a small cut surface. Bl:1-8US / Bl:16-26,28,32EU
U.S. Protected Variety / U.S. Patent No. 9,655,339

**ASILOMAR**
Mild and not bitter flavor. Nice oakleaf with a good texture. Very nice color. Good shape. HR: Bremia Bl:16-33,35EU. IR: FOL1

**BB 10693**
Baby Green Lettuce. Batavia type with dark bright green color. Thick and curly leaves. Good vigor. HR: Bl:16-36EU / Nr:0

**WINGMAN**
Good yield. Dark green and thick leaves. Good shelf life. Green color and fresh. HR: Bremia Bl:16-33,35EU

**MOJITO**

**ETHIOPIAN KALE**

**GARDEN CRESS**

**LETTUCE**

**LETTOUS**

**GARDEN CRESS**
**SHOWDOWN**

Thick texture. Product with dark red leaves. Serrated margins.
HR: Bremia Bl:16-33,35EU

**ANAPOLIS (SSC 1332)**

A red romaine lettuce developed for baby leaf salads. Glossy, deep wine-red color. Medium-broad, club shaped leaf with slightly wavy leaf margins and light serration along the stem. Slightly blistered at the 4th true leaf. Pliable texture. Bi:1-6US / Bi:16,19,21,23EU
U.S. Protected Variety / U.S. Patent No. 7,126,045

**CASWELL (SSC 3060)**

A baby leaf lettuce whose leaves resemble green oakleaf or Tango lettuce. The leaves are narrow with spiky margins and have an attractive, limegreen color. The leaf texture is very good and the flavor is not bitter. Vigorous growth.
Bi:1-6US / Bi:16,19,21,23EU

**SUREFIRE (SSC 3237)**

Thick texture. Slow growing. Product with bright red leaves and curly.
HR: Bremia Bl:16-33,35EU

**POWERHOUSE (SSC 3249)**

Very flexible. Product with bright red leaves. Attractive and bright leaves. Wine red color. HR: Bremia Bl:16-21,23-26,28-33,35EU

**STEALTH**

An oak leaf lettuce that produces attractive, wine-red colored leaves with good texture. The baby leaves have a medium-broad shape and smooth, wavy margins. Bi:1-6US / Bi:16,17,19,21,23EU
U.S. Protected Variety / U.S. Patent No. 7,314,976

**ZION**

Product typical Lollo Rossa. Variety with a thick leaves. Dark wine red leaves. HR: Bremia Bl:16-33, 35EU. IR: FOL1

**M16-006**

SAMPLE ONLY

Green mizuna with good color and nice shape.

**ASTRUM (MI 306)**

Medium late broad leaf type. Dark green with serrated leaf shape. Upright growth shape. Vigorous and high yielding selection.

**MIZUNA**

Medium green color. Strong and cold resistant mustard. Sweet flavor. Slow bolting.
**BARBAROSA**

Dark color. Variety with a good texture. Uniform.

**ROS (MR 419)**

**MX11**

New red mizuna with nice color.

**ORIGAMI**

Thick texture. Good uniformity and ability to maintain narrow leaves during regrowth. Stockier stems. Dark green color.

**SSC 2784**

Good texture. Product with a nice shape and red and green leaves. Strong leaves. Bright green stems.

**PCR 2508**

Very dark red and round leaves. Keeps the red also in hot periods.

**DAYTONA**

**VIRTUS (ER 1001)**

Cultivated rocket with rapid growth and erected leaves. Middle green color.

**BALBOA (SSC 2965)**

**CAPTIVA (DI 902)**

Captiva is an early maturing variety. It has dark green serrated leaves. Upright growth habit. Good strong characteristic rucola taste. Strong against Downy Mildew.
Celebris is early maturing with medium dark green quite strongly serrated leaves. Very upright growth habit. Strong rucola taste.

Charisma is a medium dark green, strongly serrated rucola that is medium late maturing. Strong against Downy Mildew.

Captain is a vigorous growing Wild Rocket with an upright habit. The leaf is medium serrated. Slow bolting.

Rapida is a very fast growing and very high yielding variety. Strong serrated leaf. Very suitable for winter production, but can be used all year round. Medium tolerant to bolting.

Velocity is a very fast growing and very high yielding variety. Tolerant to bolting.

Charisma is early maturing with medium dark green quite strongly serrated leaves. Very upright growth habit. Strong rucola taste.

Dark green color. Leaves with a peppery flavor. Spicy taste.

**Licorice (DK 3105)**

Dark green Kale with green thick semisavoy leaf. Good shelf life.

**KX-1**

Very innovative Kale. Nice product with a dark red wine leaf top and a green leaf bottom. Interesting 3D leaves shape. Very good tolerance to mildiou.

**KX-2**

Baby green kale with serrated leaves and 3D shape. Good tolerance to mildew.

**Red Panda (SOR 1605)**

Red Panda is strongly red colored in the veins also at very young plant stage. The growth is more compact than Fox and still with a good yield.

**Barese**

**Vita (SCR 107)**

Chard with vigorous growth. The leaf is oval, medium dark green with red veins and stems.

**VTE A Carde Blanche**

Baby Chard with green leaves and white stem. Crunchy texture.

**Fox (SOR 1601)**

Red veined Sorrel. The leaf is medium dark green with bright red veins. Very tasty with an acid tone. A beautiful addition to salad mixes.

**Tersus (TA 506)**

Medium dark to dark green leaves. Upright growth habit. Late bolting.

**Red Russian**

**Siberian Kale**

**Swiss Chard**

**Savoy Cabbage**

**Sorrel**

**Tat Soi**
**BA 1409**

BA 1409 is a vigorous growing Basil. It is high yielding and still have a good dark green color in this segment. Suitable for open field production for bunching and industry. Resistant to Fusarium.

**ADI F1**

Variety of basil with big leaves, suitable for pesto production.

**PRIMUM (DL 802)**

Primum is a vigorous plant with a strong caracteristic dill aroma. The foliage is dark green.

**TATSOI**

**BA 1409**

Parsley smooth

**COMMUN 2**

Smooth parsley with uniform dark green color. Suitable in cold conditions. Very perfumed.

**GEANT D’ITALIE**

Parsley curled with dark green leaves.

**PRIMUM**

Primum is a vigorous plant with a strong characteristic dill aroma. The foliage is dark green.

**JADE**

A double curled variety with excellent uniformity; dark green foliage; vigorous regrowth after cutting; suited for fresh market & dehydration; field tolerance to root rot; 75-80 days relative maturity.

**MESSIS (PA 609)**

Messis is a very dark triple mosscurled Parsley with an upright growth and a dense foliage. Nice scent.

**VERT FONCE**

Parsley curled with dark green leaves.

**ALTO**

Traditional curled parsley.
**SALSA**

A high yielding coriander variety with very wide adaptation. Vigorous growth and good stem development for bunching. Uniformly dark green foliage with strong aroma. Bolting tolerant. Relative maturity is 45-50 days.

**GEANT D’HIVER**

Spinach suitable for bunching. Dark green Leaves.

**PARYS F1**

Spinach suitable for bunching. Dark green Leaves semi savoy.

**FULLA F1 (SP 2901)**

SP 2901 F1 has dark green and glossy, round to oval leaves. Upright habit. Vigorous growth in the mid late segment. Late bolting. Resistant to Downy Mildew race 1-10, 15.

**MODI F1 (SP 2903)**

SP 2903 F1 has oval quite large and medium dark green leaves. Vigorous growth and early maturity. Medium late bolting. Resistant to Downy Mildew race 1-10, 15.

**SAGA F1 (SP 2907)**

SP 2907 F1 has medium dark green oval to triangular leaves. It has a vigorous growth in the mid-early segment. Resistant to Downy Mildew race 1-11, 13, 15.

**NANNA F1 (SP 2908)**

SP 2908 has oval, dark green leaves with a fairly short stem. Upright growth habit. Resistant to Downy Mildew race 1-11, 13, 15.

**MAGNI F1 (SP 2909)**

SP 2909 F1 has medium dark green, triangular to pointed leaf. It has a vigorous growth in the early segment. Resistant to Downy Mildew race 1-10, 15.

**FREYA F1 (SP 2914)**

SP 2914 F1 has a very dark green slightly puckered leaf. Suitable for baby leaf and industry. Medium early maturity. Resistance to Downy Mildew race 1-11, 13, 15.

**IDUN F1 (SP 2918)**

Idun is an early pointed leaf type for asian autumn segment. Smooth dark green leaf. Fast growing and maturing. Upright growth habit. Late bolting in this type.

Idun is not for sale in the USA and China.
SP 2925 is a fast maturing variety for autumn and early spring sowing. The leaf is dark green and the shape pointed. High yielding and upright growth habit. Resistant to Downy Mildew race 1-10, 15.

ELL F1 (SP 2925)

SP 2926 is a medium early variety. The leaves are round, uniform and medium to dark green. The growth habit is upright. Suitable for babyleaf production. Late bolting. Resistant to Downy Mildew race 1-12, 14, 15.

ATLA F1 (SP 2926)

SP 2928 F1 is a medium early variety. The leaves are triangular and fairly smooth and glossy. The color is very dark green. Upright growth habit. Late bolting. Resistant to Downy Mildew race 1-8, 12, 15.

HOLLER F1 (SP 2928)

SP 2929 F1 is a medium early variety. The leaves are triangular and smooth. The color is very dark green. Upright growth habit. Late bolting. Resistant to Downy Mildew race 1-11, 14, 15.

KARI F1 (SP 2929)

SP 2930 F1 is an early variety. The leaves are triangular to pointed and smooth. The color is dark green. Both stem and leaves have an upright growth habit. Medium late bolting. Resistant to Downy Mildew race 1-8, 11, 14, 15.

THOR F1 (SP 2930)

SP 2932 F1 is a medium early variety. The leaves are oval to triangular. The color is dark to dark green. Fairly upright growth habit. Medium early bolting. Resistant to Downy Mildew race 1-10, 15.

SOL F1 (SP 2932)

SP 2935 is an early pointed leaved type with a very upright growth habit. Color is dark green and the leaf is smooth. Its very late bolting in this segment and can be used in a long period in the season. Resistant to Downy Mildew race 1-15.

MANI F1 (SP 2935)

SP 2936 is a round to oval leaf variety which yields many uniform leaves making it suitable for babyleaf production. Medium dark green with an upright growth habit. Resistant to most Downy Mildew races.

ZISA F1 (SP 2936)

SP 2938 has round slightly puckered leaves that are uniform in size when ready for harvest. Suitable for babyleaf production. Resistant to most races of Downy Mildew.

ODIN (SP 2938)

SP 2940 is an early pointed variety with very dark green smooth leaves. Upright growth habit. Produces many leaves and is suitable for bunching or baby leaves in winter production. Resistant to most races of Downy Mildew.

SP 2940

NO SALES IN USA AND CHINA
SP 2941 is a bunching type late bolting variety with very dark colour, triangular leaves.

SP 2943 has dark green, oval to triangular semi savoy leaves. It is suitable for summer segment.

SP 2945 is a pointed oriental type variety with dark green and smooth leaves. Its an early variety with vigorous growth habit but still late bolting.

SP 2946 is a new variety for baby leaves, very nice dark green colour and uniformly rounded leaves.

SP 2949 is a new variety with good characteristics for bunching. It has pointed to triangular, smooth leaves that are very dark and glossy. The growth habit is upright. It grows vigorously so it is suitable for early bunching as autumn-winter type.

SP 2950 is a new oriental type variety with upright, medium dark green leaves. It is relatively vigorous and has medium bolting tolerance. Suits to areas where vigour and earliness is required.

SP 2952 is a new variety suitable for baby type but can also be used for bunching. It has dark green, oval to round, smooth and glossy, leaves. It has medium vigour and good bolting tolerance.

SP 2953 is a new variety, very nice type for baby leaves but can also be used for bunching. It has glossy, medium green, fairly smooth, round leaves. It has got good bolting tolerance and suits to areas with no demand of full resistance.
